

3rd Party Connectors

xConnect supports calls to 3rd party external RESTful APIs. Click [here](#) for more information on REST services.

Accessing 3rd Party Connectors

1. Log in as a power user
2. Click on the settings tab on the left-side menu

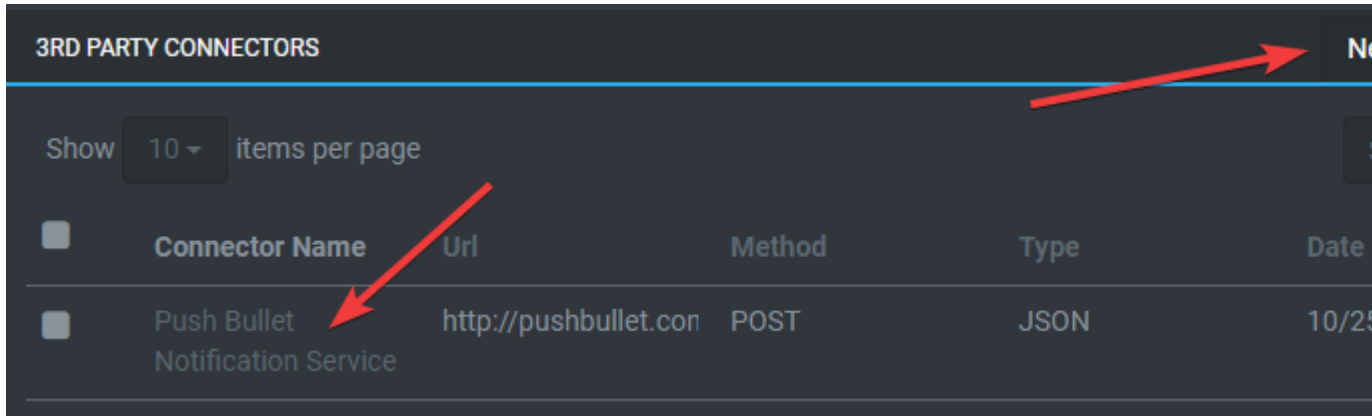

3. Click on the "3rd Party Connectors" menu item

Adding / Updating a 3rd Party Connector

1. Click on the "New Connector" button -or- click on the connector name to update an existing connector.

The screenshot shows a table titled "3RD PARTY CONNECTORS". At the top right, there is a button labeled "New Connector" with a red arrow pointing to it. Below the title, there is a "Show 10 items per page" dropdown. The table has columns: Connector Name, Url, Method, Type, and Date. A red arrow points to the "Push Bullet Notification Service" entry in the Connector Name column.

	Connector Name	Url	Method	Type	Date
<input type="checkbox"/>	Push Bullet Notification Service	http://pushbullet.com	POST	JSON	10/23

2. The editor modal will open and enable you to add or modify a connector.

Create 3rd party connector

Connector Name	Method	Type
<input type="text"/>	POST ▼	JSON
URL <input type="text"/>		
Headers		
Name	Value	
<input type="text"/>	<input type="text"/>	
➕ Add header		
Basic Auth		
Username	Password	
<input type="text"/>	<input type="text"/>	
Data		
Name	Value	
<input type="text"/>	<input type="text"/>	
➕ Add JSON data		

Cancel

Through this editor you can specify your headers, and your body data that will be sent via HTTP POST. 3rd party connectors can send XML formatted object.

Activating or Disabling a connector

1. Use the checkbox controls on the left-side of the grid to select one or more connectors in the table.
2. Click on Activate or Disable, this will allow you to disable or activate a connector.
