

Dashboard Setup

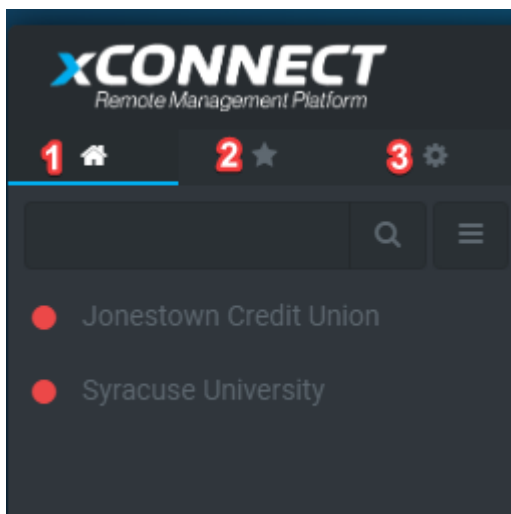

Once you have set up your gateway and installed the necessary agents, you can access the web dashboard by going

<https://senecaxconnect.com>

Initial Configuration

1. Log in to xConnect by going to <https://www.senecaxconnect.com> using a modern web browser such as Chrome, or Edge. You should have received your login information via e-mail.

2. At login, you will see a left-side navigation that will enable you to navigate through the various pages within xConnect. There are 3 tabs included on the left-side navigation:

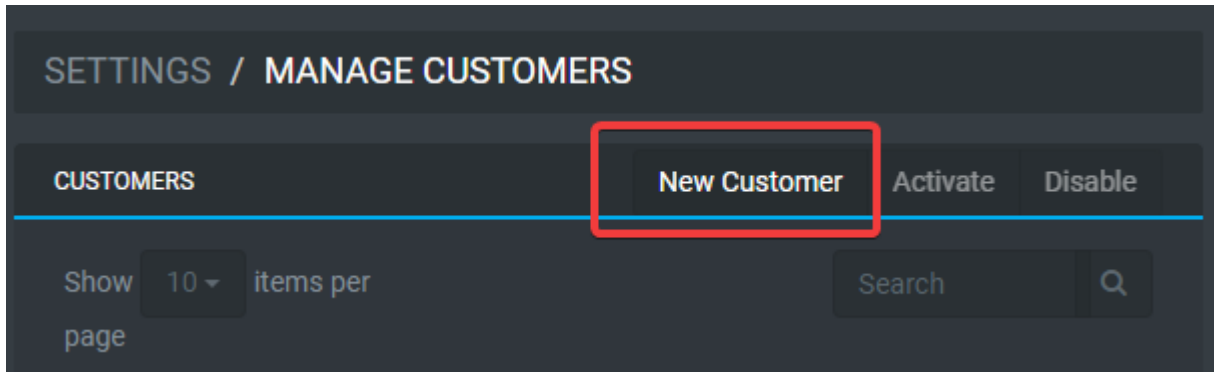

- Tab #1: Home - This tab will list all customers, gateways, servers and subsequent monitored devices that are available in your account.
- Tab #2: Bookmarks - This tab will list any resources that you have bookmarked.
- Tab #3: Settings - You can access all **management** features by using this tab. Please note: only POWER USERS will have access to this tab. End users will not see this tab.

3. Click on the Settings tab () this will show the management menu.

4. Click on "Manage Customers", this will allow you to add, remove or update any customers that you would like to see in your portal.

5. Click the "New Customer" button, which will allow you to add a new customer to the system. Enter the customer information and click the "Save" button:

7. Once you click the "Assign" button, a modal will appear and you can choose your desired customer.

Assign Customer to Gateway

When approving a gateway device you must assign it to an existing customer. If you have not created a customer, you can use the Customer Management section to do so.
