

Manage Customers

Customers are a way to differentiate your various implementations of xConnect gateways in a meaningful way. The platform uses a multi-tenant model, which means that a single xConnect instance can have one or more customers that are being maintained.

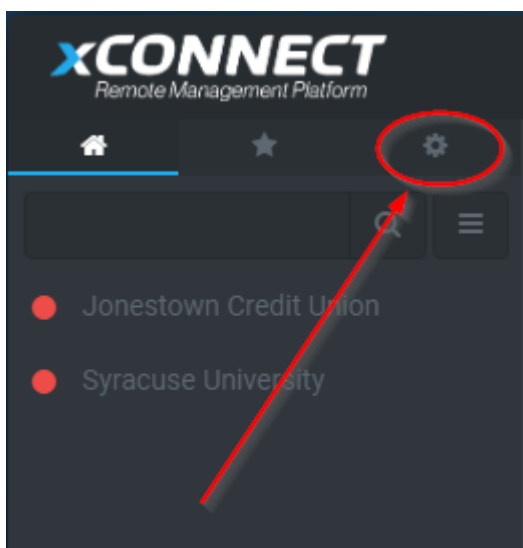

Any customers added will appear in the left-side menu:

Note: Only power users will be able to access the functionality listed below. If you are an end user, you will not be able to access this functionality.

Adding or Updating a Customer

1. Log in as a power user
2. Click on the settings tab on the left-side menu

3. By default, the manage customers page will appear. If not, you can access it by clicking on "Manage Customers"
4. If you are adding a new customer, click on the "New Customer" button. If you are updating an existing customer, c
5. The customer entry modal will appear where you can either modify or add a new customer to the platform.

Disabling and Reactivating a Customer

Disabling a customer will remove them from appearing in the side menu, and will remove the associated gateways from the customer by performing the following steps:

1. Log in as a power user
2. Click on the settings tab on the left-side menu

3. Once on the Manage Customers page, you can select one or more customers via the checkbox on the left. When 1 checkbox is selected, the "Activate" or "Disable" button appears.
