- Global Search

- We are now supporting global search! You can leverage the side bar search textbox to search across all asset types

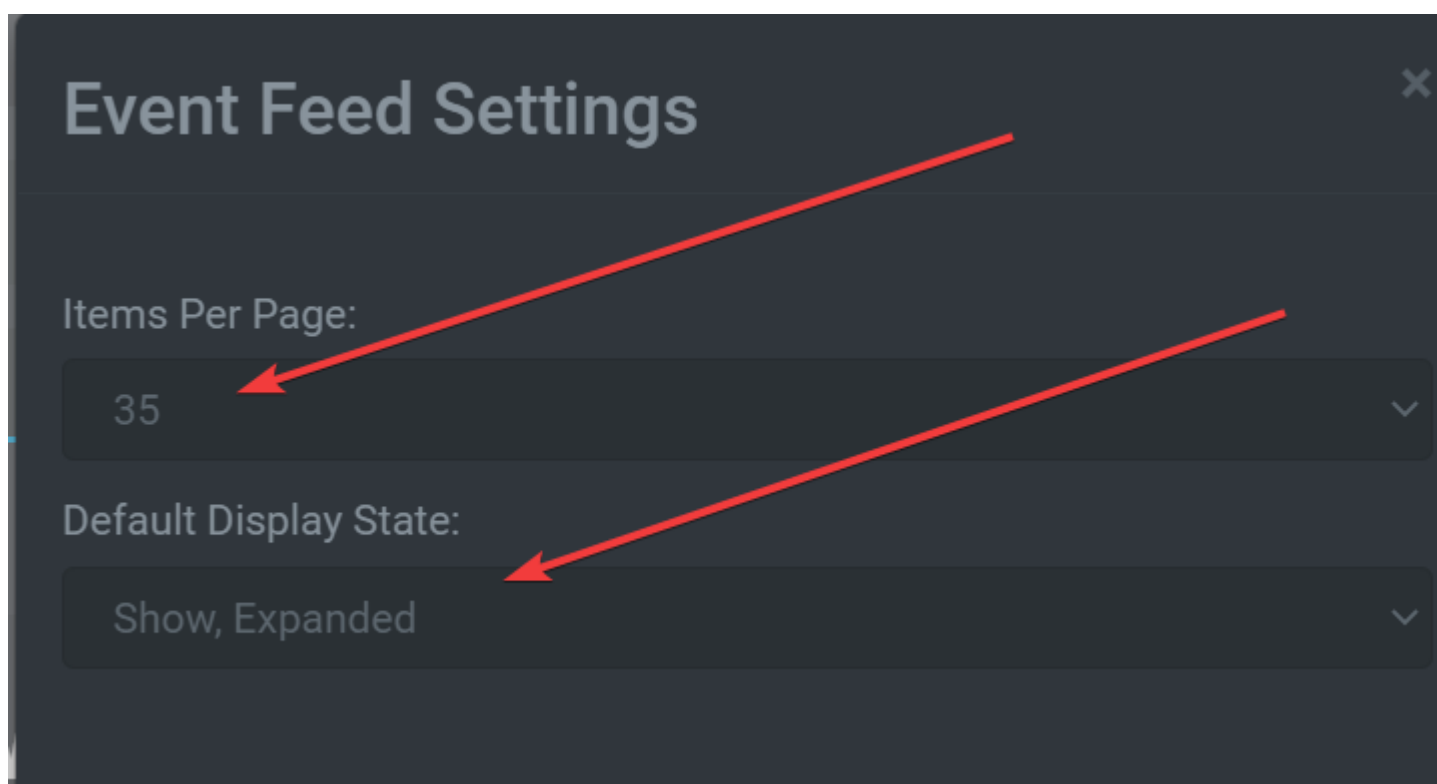

- Customizable Event Feed

- You can now customize how many events you want displayed on all event feed panels:

Clicking the gear icon will open a modal enabling you to define how many items you would like displayed on each page:

Bug Fixes

- Name of the device is now driven by the hostname sent via the agent.

- Clicking on the bookmark tab preserves your current location on the site.

Release 14.0: September 7th, 2020

Enhancements

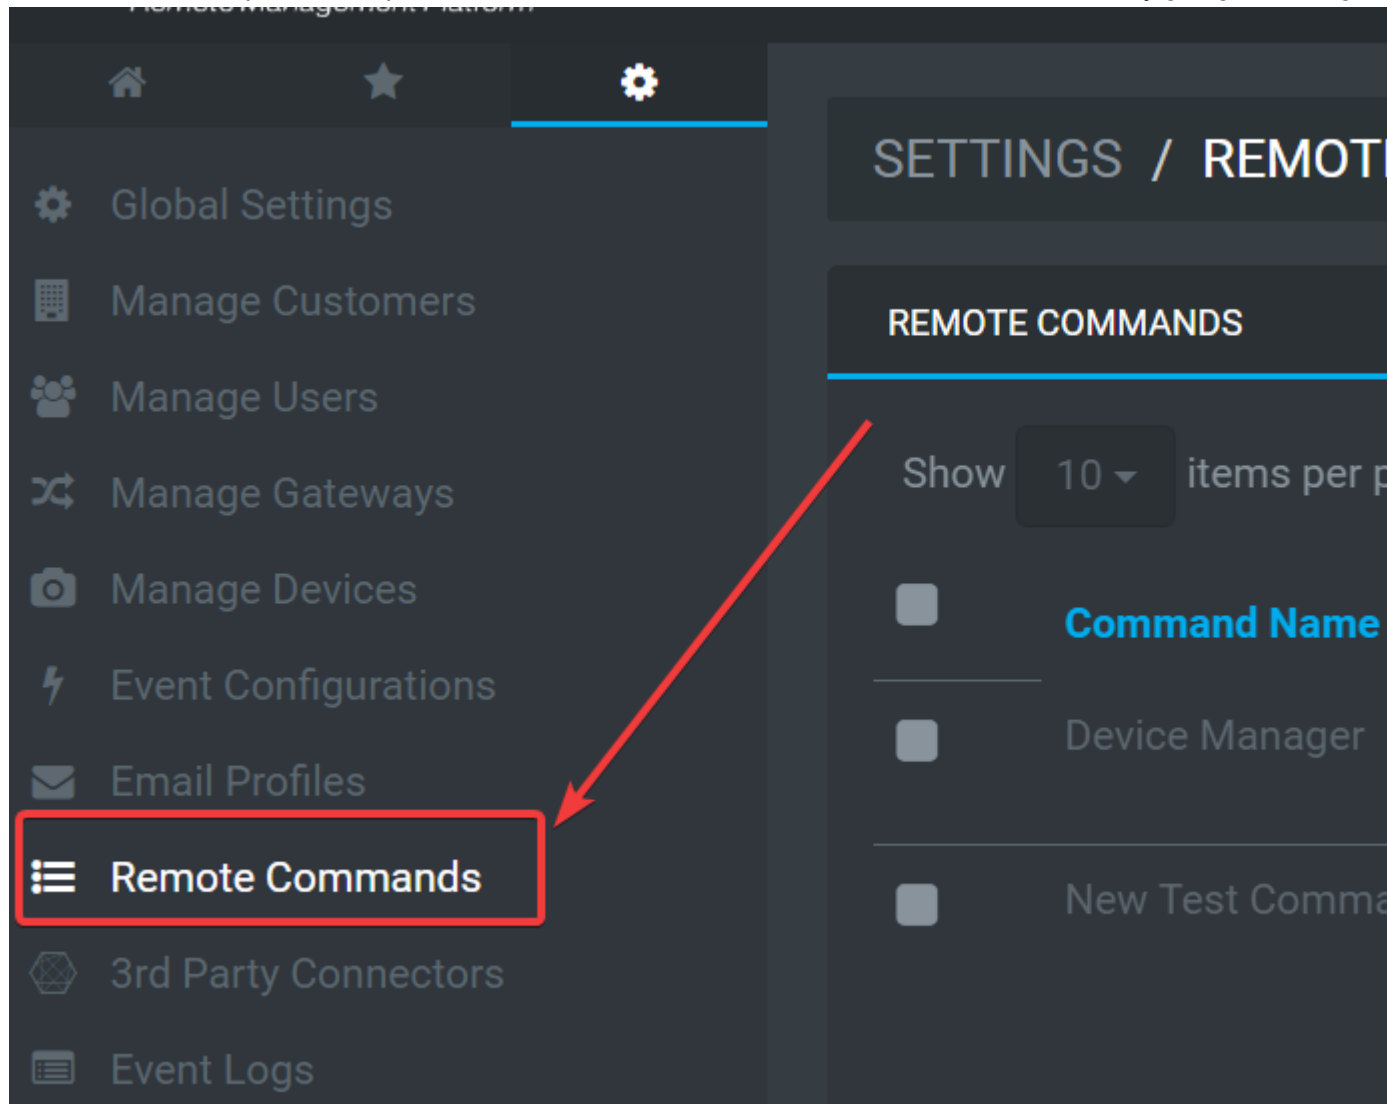

- Remote Command Execution Status Support

•

We've added the ability to see the current status of a remote command execution on the device dashboard.
later.

Remote Command History

- There is now a complete list of previous executions for a remote command. You can see this by going to Settings >

Backend Process Improvements

- We've implemented several performance improvements on our backend design to ensure the best user experience

Bug Fixes

- Unlocking a user from Manage Users will now clear out prior bad log in attempts.
- Remote Commands will now fire automatically if assigned to an event.

Release 13.1: July 16th, 2020

Enhancements

- Alert Summary E-mail Support
- We've added the ability to group your e-mail alerts together within a standard summary e-mail template.

How to Enable: - Log in using your credentials *note: You must be a power user in order to access this functionality - Click on

Bug Fixes

- Newly added devices will now automatically be applied with e-mail alerts, remote commands, or third party connectors

Release 13: June 23rd, 2020

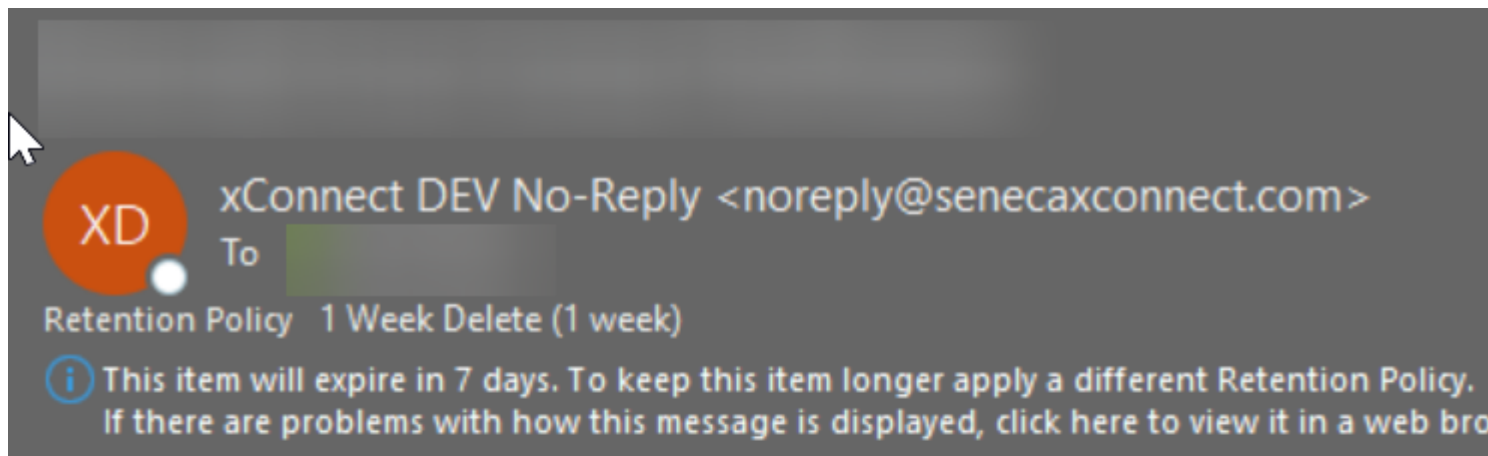

Enhancements

- Event Feed alterations to the navigation links.
- Modified the way the event feed links navigate a user to the appropriate device dashboard and event log listing.

Upon clicking the device name (i.e. Server01) a user will be taken to the device dashboard. Clicking the table icon () wi

- Company Abbreviation added to all alerting e-mails
- Enables xConnect support to easily identify which e-mail alerts originated from a particular xConnect customer.

CAUTION: This email originated from outside of the organization. This message might not be a valid message.

The following criteria was met: Network_NIC1_MaxLinkSpeed > 20

Device information:

UID: 4C4C4544-0059-5010-8048-C2C04F584D32

Event information:

Timestamp: 2020-05-15T15:46:07.026Z

Network_NIC1_MaxLinkSpeed: 500

Company Code: ABC

- Release version # added to the home page, which links to release notes.
- Maintenance mode: prevents potential spamming of alerts in the occurrence of a scheduled maintenance window. Enh

The xConnect web portal is currently unavailable due to scheduled maintenance and will be back up shortly. Please contact support@senecaxconnect.com if you have any questions or require immediate assistance.
